PROJECTS EXPERIENCE

eCommerce Website: The primary goal of an e-commerce site is to sell goods and services online with a voice recognition system. This project is a web-based shopping system for an existing shop. I developed this project using MERN Stack Development method MongoDB, Express JS, ReactJS, NodeJS.

Personal Website: This website is to showcase my skillset and knowledge to others using the internet and it contains my skills, experiences, expertise, knowledge, and more. I coded for the front-end development using HTML, CSS, JavaScript.

Job Board Website: I developed this website for students to search and apply jobs and added the feature for recruiters to post the jobs. I coded this project using MERN stack development method using MongoDB, ExpressJS, ReactJS, NodeJS.

E-Healthcare Management System: This project deals with Corporate Medicare Management. The main aim of this project is to provide effective management of data related to staff and patients in hospitals or clinics. I developed the UI for this project using Python and Django.

Tech Community Website: This project deals with Students and professionals so they can sharpen and empower their technical skills with the help of a mentor in the same sector. I coded for the front-end using HTML, CSS, JavaScript, Bootstrap.
